Traffic Advisors™

WHELEN®

WHELEN TRAFFIC ADVISORS™ FEATURES

Traffic Advisors are the versatile answer to alert oncoming traffic with a visual warning and correct direction or signal with bright, signal sequencing. Professional and special use vehicles can be fitted with models for rear window deck, built into lightbars or with outside mounted large arrows that can be seen at much greater distances.

■ Versatile, bright high intensity warning protection in: low profile sizes, large high profile arrows, flush mount stand alone units, or built into lightbars ■ High intensity LEDs are rated for over 100,000 hours of service with low current consumption ■ Rugged, water resistant LED modules stand up to road shock and vibration ■ 6 programmable direction sequence flash patterns, up to 8 Scan-Lock™ flash patterns and control head (except Dominator™ TAD & Inner Edge®) ■ Remote “flash pattern” control, end lamp enable/disable feature ■ Most Traffic Advisor models include a 15' interconnecting cable with quick disconnect feature ■ LED display on control head replicates the lamp sequence and visual pattern ■ 5 year warranty on LED models

STRAIGHT STYLE WITH TIR3™ LIGHTHEADS

TAM Series, TIR3 Super-LED®

Externally controlled, extreme low profile extruded black aluminum housing, includes control head.

TAD Dominator™ Series, TIR3 Super-LED

Dominator requires customer supplied switches or optional TADCTL1 control head with choice of up to 3 of Whelen's optional TADSW1-3 switches available for other warning light requirements. Includes four directional sequences and multiple Scan-Lock flash patterns for end flashers.

TAM83CV in interior rear deck with third brake light spacer clearance panel.

TAM63 / TAD6 : Six lamp Traffic Advisor

TAM83 / TAD8: Eight lamp Traffic Advisor

TAM83** / TAD8**: Six lamp Traffic Advisor with 2 end flashers

TAM8348: Eight Lamp Traffic Advisor

TAM83CV/TAM83C**: Both models have a clearance spacer panel for vehicle's third brake light and includes rear deck mounting bracket for 2003-2009 Ford Crown Victoria, mounts to child restraint anchor (Choose from an 8 lamp Traffic Advisor or a 6 lamp TA with 2 end flashers)

LARGE STRAIGHT STYLE WITH 700 SERIES

Twice the size and proportions of the TA837A for large primary emergency or maintenance type vehicles. Eight 700 Series 7"x 3" halogen or LED lamp modules are mounted in a 72" Edge® Plus™ extruded aluminum housing. Easily mounted on vertical surfaces or to user supplied brackets. Molded polycarbonate lenses are easily replaceable. Heavy-duty 20' TPR insulated cable connects the light array to control head. Optional custom length housing (up to 100") and/or cable lengths.

STRAIGHT STYLE CONTROL HEADS

LED & HALOGEN TRAFFIC ADVISOR™ CONTROL HEADS

Two compact, easy to use and operate remote control heads are available for 5 to 8 lamp Halogen or LED light arrays. A four function rotary switch selects from Left Arrow, Right Arrow, Split Arrow or Flash Pattern. LED status display on control head faceplate replicates operation for visual confirmation of pattern. Dip switches on rear panel easily selects choice lamp sequence patterns. A rocker DPDT/Center-Off switch turns the unit High/Off/Low.

Control Head	Five Sequence Styles
<p>RF Wireless Remote Control</p> <p>Traffic Advisor LED wireless remote controller is standard and available only with radio controlled Traffic Advisors. The controller has a total of six buttons (three arrow). The Scan-Lock selected sequence style, once selected, is applied to all three arrow buttons (left, right and split).</p>	<ul style="list-style-type: none"> • Solid Arrow (default) • Solid Half Arrow • Sequence to TripleFlash • Sequence to Solid • Sequence-On / Sequence-Off

ARROW STYLE TRAFFIC ADVISORS™

These big bright left and right arrow head halogen or LED Traffic Advisors direct real-time visual communication with clear signal sequencing to oncoming traffic in hazardous highway maintenance or accident situations. These unique moving flash patterns assure quicker recognition at greater distances.

- All models have four operating modes (left, right, split and flash) with eight programmable flash patterns
- Extruded aluminum housings with black finish have removable arrow heads for ease of storage and shipping
- Six 3/8" slide bolts which allow easy mounting on vertical surfaces or to user supplied brackets
- All include TACTRL3A control head, except Model TA1660L which is Serial Communication and comes standard with a TACTRL2 control head
- Available in 5', 6', 7' or 8' lengths (specify length when ordering)
- All include cable and connectors
- Twenty-five foot, 16 conductor cable supplied with arrow (two piece arrows have 10' of inter-connect cable between light arrays)
- Meets MUTCD2000 specifications when mounted on appropriate backboard

§ - Replace with warning color desired. Order is Red/Blue/Amber

Inner Edge® Super-LED® Traffic Advisor™ Systems for Interior Mounting

Low profile interior vehicle warning systems with incredibly bright Super-LED lightheads mounted in a rugged housing. They fit snugly against the upper or lower back window of late model vehicles

Please note that Inner Edge Traffic Advisors are vehicle specific.

- Full featured interior lightbars that are virtually undetectable when not in operation
- Eight Linear Super-LEDs, or eight or ten TIR3™ Super-LED modules in sturdy, rugged housing that mounts against the upper or lower back window of late model vehicles
- Super-LEDs are low current, vibration and moisture resistant for reliable long life operation
- Easy installation
- Scan-Lock™ provides selectable multiple flash patterns
- Two wire design operates Traffic Advisor flash patterns eliminating need for specific Traffic Advisor control head
- Order by choosing the desired housing model, and then add LED lighthead colors
- Requires customer supplied switches or control head, purchased separately
- Designed to blend with vehicles existing interior
- Five-year warranty on LED modules

Rear Facing/Upper Series for Ford Crown Victoria

Eight Linear-LED modules in sturdy housing that mounts against the back upper rear window of late model Ford Crown Victoria police vehicles for a full-featured lightbar that is virtually undetectable when not in operation. Meets SAE specifications.

- Mounting kit, standard
- Requires customer supplied switches or control head purchased separately
- Scan-Lock provides multiple flash patterns

Outer Edge® Super-LED® Traffic Advisor Systems for Exterior Mounting

Rear Facing Upper Exterior Mount Super-LED Lightbar Series for Chevy Tahoe 2008-2010

The Outer Edge is a vehicle specific, custom design of two independent rear facing vacuum formed ABS housings of four LINZ6™ modules, molded to mount on the outside rear window of a 2008-2010 Chevy Tahoe. Fully encapsulated for moisture and vibration resistance, the Outer Edge is designed for rugged, reliable long-life service under the toughest conditions. Two versions are available.

- Clear, non-fluted lenses are sealed to the base for thermal heat management
- Features seven Scan-Lock™ flash patterns for flashing mode plus Traffic Advisor sequence
- Flash patterns: SignalAlert™ 75, CometFlash® 75, SingleFlash 75, 150, 375, ActionFlash™ & ActionScan™
- Scan-Lock patterns: sequence to solid, sequence on/sequence off, one lamp to TripleFlash™, and two lamps to TripleFlash™
- Mounts to body and back window with 3M® VHB 2 sided tape, included
- Standard interconnect harness connects right and left side housings and a 20' power cable.
- 5 year warranty on LEDs
