Installation Guide: SA315 Siren Speaker Mounting Bracket 2006 - 2009 Chevrolet Impala SAK34

DANGER! Sirens produce extremely loud emergency warning tones! Exposure to these tones without proper and adequate hearing protection, could cause ear damage and/or hearing loss! The Occupational Safety & Health Administration (www.osha.gov) provides information necessary to determine safe exposure times in Occupational Noise Exposure Section 1910.95. Until you have determined the safe exposure times for your specific application, operators and anyone else in the immediate vicinity should be required to wear an approved hearing protection device. **FAILURE TO FOLLOW THIS RECOMMENDATION COULD CAUSE HEARING LOSS!**

Safety First

This document provides all the necessary information to allow your Whelen product to be properly and safely installed. Before beginning the installation and/or operation of your new product, the installation technician and operator must read this manual completely. Important information is contained herein that could prevent serious injury or damage.

- Proper installation of this product requires the installer to have a good understanding of automotive electronics, systems and procedures.
- If mounting this product requires drilling holes, the installer **MUST** be sure that no vehicle components or other vital parts could be damaged by the drilling process. Check both sides of the mounting surface before drilling begins. Also de-burr any holes and remove any metal shards or remnants. Install grommets into all wire passage holes.
- If this manual states that this product may be mounted with suction cups, magnets, tape or Velcro[®], clean the mounting surface with a 50/50 mix of isopropyl alcohol and water and dry thoroughly.
- Do not install this product or route any wires in the deployment area of your air bag. Equipment mounted or located in the air bag deployment area will damage or reduce the effectiveness of the air bag, or become a projectile that could cause serious personal injury or death. Refer to your vehicle owner's manual for the air bag deployment area. The User/Installer assumes full responsibility to determine proper mounting location, based on providing ultimate safety to all passengers inside the vehicle.
- For this product to operate at optimum efficiency, a good electrical connection to chassis ground must be made. The recommended procedure requires the product ground wire to be connected directly to the **NEGATIVE (-)** battery post.
- If this product uses a remote device to activate or control this product, make sure this control is located in an area that allows both the vehicle and the control to be operated safely in any driving condition. **DO NOT ATTEMPT TO ACTIVATE OR CONTROL THIS DEVICE IN A HAZARDOUS DRIVING SITUATION.**
- It is recommended that these instructions be stored in a safe place and referred to when performing maintenance and/or reinstallation of this product.
- **FAILURE TO FOLLOW THESE SAFETY PRECAUTIONS AND INSTRUCTIONS COULD RESULT IN DAMAGE TO THE PRODUCT OR VEHICLE AND/OR SERIOUS INJURY TO YOU AND YOUR PASSENGERS!**

**ACTIVATION OF THIS
 SIREN MAY DAMAGE
 UNPROTECTED EARS!**

**Wear
 Protection!**

CAUTION

Loud siren noise can cause hearing damage and/or loss. Refer to OSHA Section 1910.95 prior to putting ANY siren into service!

FIG. 1

Mounting Speaker to Bracket

The SA315 mounting kit is supplied with 3 long bolts (1/4-20 X 1-1/4" FLAT HD) which go through the mounting bracket, siren housing and into the siren driver. They will replace 3 of the 4 shorter bolts ("A") that now secure the siren driver to the speaker housing. Your speaker is shipped with 2 short bolts installed. A short bolt must be used in the hole that **does not** go through the bracket so it will properly secure the driver to the housing. If you need to remove 4 bolts at once be sure to hold the driver securely in place.

IMPORTANT: For drainage purposes, the speaker must be oriented so the wire passage/drain hole is in the "6 o'clock" position (closest to the road). Improper mounting will result in premature driver failure and void the product warranty.

Installation:

To access the speaker bracket mounting area, remove the driver-side headlight assembly (refer to the vehicle service manual for proper removal procedure). **Do not mount to the passenger-side of the vehicle.**

1. First secure the siren speaker to the bracket (Fig. 1).
2. With the headlight assembly removed, locate the mounting area behind the headlight (Fig. 2). The speaker bracket mounts as shown using the 2 existing bolts indicated in Fig. 3.
3. Remove the 2 bolts indicated and secure the bracket using the 2 existing bolts.
4. Extend the WHITE (positive) and BLACK (negative) speaker wires to your siren amplifier and connect as shown in the amplifiers instructions. Test the speaker to confirm proper operation.

FIG. 2

FIG. 3

5. Re-install the headlight assembly to complete this installation. Test all vehicle components and equipment for proper operation before returning the vehicle to service.

IMPORTANT! It is the responsibility of the installation technician to make sure that the installation and operation of this product will not interfere with or compromise the operation or efficiency of any vehicle equipment!
